### **TradeMark EHS Manager, Jeff Kirk, Earns CSP Certification, David “DJ” Jarrett Promoted to Production Superintendent**

Tampa, Florida (May 19, 2014) – Last week Jeff Kirk, EHS Manager for TradeMark Nitrogen Corp., earned his certification as a Certified Safety Professional (CSP). This highly respected certification is awarded to individuals who meet academic standards, satisfy professional safety experience requirements, and have passed two rigorous examinations. The examinations covered a wide range of topics including: engineering and management aspects of safety, applied sciences, legal and regulatory matters, professional affairs, and other safety-related topics.

“Jeff’s attention to detail, focus on continuously improving the safety of our facility, and ability to motivate other employees to constantly think about safety are qualities that are irreplaceable for someone in Jeff’s position,” said Mike Barry, President, TradeMark Nitrogen. “Our industry has always been under heavy scrutiny and even more so since the accident at West Fertilizer. The safety of our employees and community is our number one priority. “

TradeMark Nitrogen Corp. did not have to look far for its newest addition to the management team. David “DJ” Jarrett comes to the helm with almost 30 years of experience working in the nitric acid plant. David replaces Wayne Wilson, who was the previous Production Manager for 31 years. “DJ knows this plant as well, if not better than anyone else in the company,” said Omar Bourassa, Technical Manager.

DJ began his career at TradeMark Nitrogen in 1985 as Solutions Operator and made his rounds through the plant before becoming a Supervisor in 1995. When asked about working for TradeMark for almost 30 years, David responded by saying “It’s the greatest place on the face of this earth to work, we’ve always been blessed with great ownership and have always been taken care of.” Of TradeMark’s 32 employees, 20 have been with the company for more than 10 years.

### **About TradeMark Nitrogen**
