Detcon inc. SmartWireless® Technology Installed at TradeMark

Tampa, Florida (August 2014) – TradeMark Nitrogen Corp. recently installed an advanced new wireless gas detection system at its facility in Tampa, FL adding an extra layer of protection to ensure the highest level of safety at the chemical manufacturing site.

“You can’t for one second think your facility is safe enough,” said Jeff Kirk, TradeMark Nitrogen’s EHS Manager. “Anything we can do to keep our employees safe and our community out of harm’s way will most definitely be done.”

Thanks to Detcon, an IST company, a complete SmartWireless® Ammonia gas detection system is now installed throughout the facility. The system includes up to 32 low power ammonia gas detectors strategically placed around the manufacturing site to create a mesh network. Capable of detecting the slightest traces of ammonia, each device operates on a 2.4 GHz frequency and is within line-of-site range of at least two other gas detectors allowing for constant wireless communication among all devices. All devices in the network communicate with an HMI module that includes an audio-visual alarm system to alert personnel when various trace-levels of ammonia have been reached. Both the EHS Manager and Plant Supervisor have complete access to the module throughout the day.

About Detcon Inc.

Detcon is a global leader in the design and manufacturing of a wide range of industrial grade gas detection sensors and electronic control systems. Detcon was established in 1983 and began commercial activity with its first products in early 1985. Today the company had grown to include a wide range of sensor technologies and state of the art product designs engineered to perform reliably in the most challenging and rugged industrial environments. Detcon’s growing success is achieved by fusing decades of field experience with engineering expertise to produce superior products and innovative solutions.

About TradeMark Nitrogen

TradeMark Nitrogen Corporation is a wholesale manufacturer, seller and distributor of bulk commodities for industrial and agricultural customers throughout the U.S. With over 30 years of experience in the fertilizer industry, our highly trained staff has earned a reputation for reliability and performance. TradeMark is positioned to meet the demands that are required in a changing and expanding environment. TradeMark operates on a customer focused philosophy, open for business 24 hours a day/7 days a week/365 days a year to facilitate customer schedules and needs.
