TRADEMARK NITROGEN – FLORIDA SOUTHERN COLLEGE SCHOLARSHIP

Tampa, Florida (August 31, 2015) – The Florida Fertilizer & Agrichemical Association (FFAA) has announced that they are now accepting applications for their annual scholarships to be awarded at this year's FFAA Winter Business Meeting in St. Augustine, Florida. TradeMark Nitrogen will again sponsor their annual scholarship awarded to students attending Florida Southern College. The TradeMark-Florida Southern College (FSC) Scholarship Fund was established to offer scholarships to qualified agriculture, or related field of study, students at FSC. These scholarships are designed to promote the study of agriculture in higher education and to encourage academic excellence among students pursuing agricultural studies. Joel Stuckey was a more than deserving recipient of last year's TradeMark Nitrogen-FSC Scholarship.

Thanks to various fundraising events, including an annual sporting clays tournament in October and a golf tournament held in May, the FFAA and its member organizations were able to provide a record 15 scholarships totaling more than \$30,000 to more than qualified students throughout the state of Florida. It is the mission of the FFAA that some of these students will utilize their talents to improve Florida agriculture through research or employment in the Florida agribusiness industry.

Anyone who would like to apply for a scholarship in 2015 or who is looking for further information on other scholarships that the FFAA has provided should visit <http://www.ffaa.org/scholarship.html>. The deadline to apply for this year's scholarships is October 15, 2015.

About the Florida Fertilizer & Agrichemical Association (FFAA)

FFAA was originally formed in 1932 as the Florida Agriculture Research Institute, Inc. Its mission was to furnish information to the agricultural community on fertilizer and agrichemical use. In 1986, the name was changed to Florida Fertilizer and Agrichemical Association, Inc. Today, FFAA represents the fertilizer, limestone and agrichemical industries that operate in Florida. FFAA's main objectives are to enhance the public's perception of the Florida's fertilizer and agrichemical industry and to promote the safe, responsible use of these products.

About TradeMark Nitrogen Corp.

TradeMark Nitrogen Corporation is a wholesale manufacturer, seller and distributor of bulk commodities for industrial and agricultural customers throughout the U.S. With over 30 years of experience in the fertilizer industry, our highly trained staff has earned a reputation for reliability and performance. TradeMark is positioned to meet the demands that are required in a changing and expanding environment. TradeMark operates on a customer focused philosophy, open for business 24 hours a day/7 days a week/365 days a year to facilitate customer schedules and needs.
