FERRIC NITRATE SOLUTION

Description
Ferric Nitrate Solution is a clear, reddish brown liquid that is produced using the highest quality iron. It can be used to correct iron deficiencies in soils and plants and it is also compatible with many liquid fertilizers, micronutrients, pesticides, and water. It mixes easily with ammonium nitrate solution, calcium nitrate solution, copper nitrate solution, magnesium nitrate solution, manganese nitrate solution and zinc nitrate solution.

Uses
- As a vital plant nutrient, ferric nitrate is used to provide a source of iron in both soil and foliar fertilizer applications
- In the manufacture of chelates, and agricultural micronutrients

Handling & Storage
Recommended storage above 32°F. Store in a well ventilated cool, dry place out of direct sunlight. Prevent from freezing. Containers should be kept closed and labeled properly. Liquid is an oxidizer and may cause fire with combustibles. Avoid contamination with combustible materials. Keep away from fire. Extreme heat may cause decomposing to toxic fumes of nitrogen oxides.

Environmental Considerations
Ferric nitrate solution contains ferric nitrate, a chemical recognized by the U.S. Environmental Protection Agency (EPA) as a hazardous substance subject to reporting to the National Response Center, as well as state and local authorities.

Shipping
Ferric Nitrate Solution is hazardous and classified as a corrosive liquid. The US Department of Transportation proper shipping name is: UN3093, Corrosive Liquid, Oxidizing, N.O.S. (Ferric Nitrate Solution), 5.1, PG II. The Emergency Response Guidebook Number is 154. Ferric Nitrate Solution transported in bulk must be placarded.

Chemical & Physical Properties
- Chemical Formula: Fe(NO₃)₃
- CAS Number: 7782-61-8
- Specific Gravity @ 60°F (17.8°C): 1.43
- pH: < 2.0
- Salt-Out Temp: -30°F (-34.4°C)
- Color: Reddish to brown
- Odor: No odor detected
- Weight per Gallon: 11.9 lbs/gal (1.43 kg/L)
- Gallons per Ton: 168.07 (0.64 L/kg)

Typical Analysis
- Nitrogen (N): 7.0%
- 7.0% Nitrate Nitrogen: 7.0%
- Iron (Fe): 9.5%
- Ferric Nitrate (Fe(NO₃)₃): 41.0%
- Insoluble: < 0.01%
- Chloride (Cl): < 0.01%
