

83% AMMONIUM NITRATE SOLUTION

Description

83% Ammonium Nitrate (AN) Solution consists of pure ammonium nitrate and water. TradeMark Nitrogen supplies Industrial AN solution in 60% and 83% concentrations. Other strengths can also be supplied upon special request.

Uses

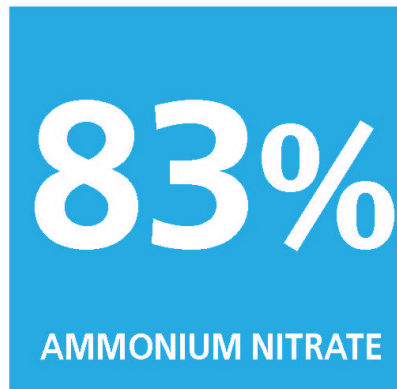

- As a component of explosive mixtures used in mining, quarrying and civil construction
- In the manufacture of catalysts for petroleum refining
- In the production of other nitrate salts

Handling and Storage

Ammonium Nitrate Solutions should be stored in stainless steel or other corrosion resistant vessels. Pipe lines and fittings should be of similar materials. These solutions must be stored above their salting-out temperatures. Heating coils or heat exchangers must be installed with storage vessels where ambient temperatures below salting-out temperatures are expected for long durations.

Shipping

83% Ammonium Nitrate Solution is classified as a hazardous material by the US Department of Transportation. The proper shipping name is: UN2426, Ammonium Nitrate, Liquid (Hot Concentrated Solution), 5.1. The Emergency Response Guidebook number is 140. Shipments are made by rail or tank trucks. Bulk shipments must be placarded.

Chemical & Physical Properties

CAS Number	6484-52-2
Molecular Weight	N/A
Specific Gravity @ 60°F (15.5°C)	1.37
pH	6.3 – 7.8
Salt-Out Temperature	155°F (68.3°C)
Color	Clear
Odor	Little to no detectable odor
Weight per Gallon @ 60°F (15.5°C)	11.33 lbs/gal (1.36 kg/L)
Gallons per ton	176.52

Typical Analysis

Total Nitrogen	29%
Ammonium Nitrate	83.0%
Free Ammonia	0.2%
Water (Approx)	17.0%
